

## Elephant Circle Cannabis and Breast Milk Study

Looking for:

Regular cannabis users with a breastfeeding baby between 1 and 6 months old!

We are looking to recruit subjects for data collection beginning in April 2020.

Who: Regular (daily or near/daily) cannabis users  
With a nursing baby 1-6 months old  
Willing to confidentially and anonymously participate in a research study

What: Express breastmilk\* for a baseline reading  
Consume a specific amount of a particular flower  
Express breastmilk at several time points after consumption  
Immediately freeze the samples  
Mail the samples to the lab for analysis

\*A pump can be provided if one is needed

When: Subjects will be contacted in April or May for participation

Where: Register to be contacted [here](https://docs.google.com/forms/d/e/1FAIpQLSdNIhlsn0h4VYBnbs3dPBz7-Hjk0WZr--vbfx6bFU5s56mqZQ/viewform)
